

# Hamza Shafiq

## Lead Engineer

@ hamzashafiq44@gmail.com

<https://www.linkedin.com/in/hamzas-hafiq44/>

## SUMMARY

Full Stack Engineer with 8+ years of experience in developing high-performance software solutions using Vue, React, Ruby on Rails, Angular, and Django. Proven track record of leading teams, collaborating with stakeholders, and implementing best practices to deliver innovative, scalable solutions. Skilled in both front-end and back-end development, with a focus on solving complex technical challenges and achieving business objectives.

## EXPERIENCE

### Lead Engineer

#### Hivebuy

10/2021 Berlin, Germany

- Led the frontend development of the product from the ground up using Vue 3.
- Developed the majority of the application, including key features such as authentication with FusionAuth and UI component management with Storybook.
- Applied best practices to enhance application performance and scalability.
- Provided mentorship to new team members, ensuring smooth onboarding and skill development.

### Tech Lead

#### Sendoso

07/2019 - 10/2021 Lahore, Pakistan

- Led the development and deployment of new features, handled change requests, and efficiently resolved bugs.
- Directed Vue.js projects while mentoring and training developers in Vue.js best practices.
- Conducted interviews and played a key role in hiring full-stack developers.
- Managed and guided a team of over 15 engineers for more than a year, ensuring project success.
- Improved test coverage to 90% across various projects, enhancing overall code quality and reliability.

### Senior Software Engineer

#### Arbisoft

11/2017 - 07/2019 Lahore, Pakistan

- Developed and implemented new features, managed change requests, resolved bugs, and oversaw deployments.
- Delivered projects and applications in alignment with the project roadmap and deadlines.
- Led interviews for hiring full-stack developers.

### Software Engineer

#### Square63

06/2016 - 11/2017 Lahore, Pakistan

- Implemented new features, handled change requests, resolved bugs, and managed deployments.
- Conducted daily pull request reviews to ensure code quality and team collaboration.
- Identified opportunities to enhance scalability and performance across the application.
